

# SUPER HI-FOAM TFR

## SNOW-FOAM BLANKET

**Foam Blanket TFR:**

Super Hi-Foam delivers a highly visual stable foam blanket, making it ideal for car wash and commercial cleaning stations. Clinging foam assists in cleaning performance in removal of traffic film, dirt, grease and oil.

**Economic:** Concentrated formula for excellent economy.

**Paint & Trim Friendly:** Contains livery enhances: Kind to paintwork, trim and vehicle signwriting. Will not mark or dull surfaces: totally safe cleaning action even with repeated use.

**Versatile:** Suitable for all foaming and wash equipment

**Environment Friendly:** The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.

**DIRECTIONS :** Super Hi-Foam has been specially designed to deliver a dense foam blanket when applied using foam lance or foam lance attachment.

**Dilution:**

**As a pre-mix, typically dilute with up to 4 parts water, so add 5L to 20L of water to make 25L mix ready for machine.**

Detergent feed meter should be adjusted so that the foam level meets user requirements.

Metering equipment should be set to pick up concentrate base at between 1: 25 or 1: 30 depending on degree of foam requirement.

Super Hi-Foam should be applied from bottom up and allowed to dwell until foam breaks.

**NB:** Do not allow material to dry out on any surface or staining mat occur.

After use rinse away thoroughly with plenty of cold water.

In very hot weather we recommend surfaces being cleaned to be cooled by pre-spraying with cold water before application of cleaning solution.

**Typical Specification :**

Composition : A complex blend of non-ionic and cationic surfactants coupled with chelating agents, and water.

Appearance : Clear liquid

Colour : Opaque

S.G. : 1.047

pH : 13

Odour : Mild

Shelf Life : 3 years minimum in unopened containers at ambient temperature. Protect from freezing.

Packaging : 25L, 200L & 1000L containers.
