

Magic on floors...

In addition to its compact design, the handle system allows a full range of operator heights to be easily selected to suit the individual user, whilst the big, soft ride wheels ensure optimum manoeuvrability in use. In addition to the operational mode the handle and wheels specification provides for easy transit and exceptional compactness where the machine needs to be transported from one location to another.

Quick change battery

Folds down very small for easy storage or transit

TTB 1840

Better by design...

The 1812 by Tchaikovsky is a fine overture as indeed is the 1840 by Numatic!

TTB 1840...

The TwinTec 1840 battery floorcare machine has been engineered to substantially reduce size whilst, at the same time, maximise the performance and handling.

With the total freedom of 24V battery, cable free, operation, this machine will get into areas and places that other machines simply will not go. In many respects, the 1840 allows hard floor maintenance in areas previously cleaned by mopping systems, but some 30% faster and to an improved standard. With its low noise level and unobtrusive appearance this machine will find itself fully at home in many, if not all, commercial environments be it hospitals, clinics, restaurants, cafeterias, offices, bank and hotel lobbies, etc.

Wherever there's a need for a simple, user friendly, one-pass cleaning machine the TTB1840 will be sure to match, or exceed, your expectations.

Small is truly beautiful..

A range of easy fit brushes and drive boards; all incorporating our 360° water feed system providing uniform liquid delivery to the floor, ensuring consistent performance standards.

Easy and generous fill cap

Simple soft touch controls

Overfill control and trash filter

Rugged steel chassis with full and easy access to all components

270° Rotating Squeegee System

Robust and generous 18-litre polyform clean water container

Easy clean polyform top dirty water container with simple dump hose emptying feature

Quick change gel battery pack

Built from the ground up, or should we say floor up, the complete 1840 concept is new, developed however using much of our time-tested components and technology to ensure performance and reliability go hand in hand.

Fitted as standard with our suitcase style 18 Amp sealed gel battery pack. A second standby unit allows extended performance, up to 1.5 hours - one battery being used and the other on charge. A separate charger is supplied as standard.
